Address: Seattle, WA

Executive Summary: Strategic and technical Principal Technical Program Manager with 22+ years of experience delivering complex and scalable cloud-based programs. Proven success aligning Engineering, Product, and cross-functional teams to build high-availability platforms and drive architectural excellence. Adept at resolving ambiguity, influencing across organizations, and accelerating product delivery using Agile best practices.

Core Competencies

Technical

- Software Development & Engineering
- Software Architecture
- Cloud Infrastructure (AWS & Azure)
- Composable and MACH (Microservices, API-first, Cloud-native and Headless) e-Commerce platforms

Leadership & Management

- Stakeholder Management & Communication
- Program Governance
- Large-Scale Cross-Functional Collaboration
- Technical Program & Project Management
- Agile Methodologies
- Team Building & Mentorship

Strategic & Analytical

- Strategic & Tactical Planning
- Data-Driven Decision Making
- Process Improvement and Optimization
- Risk Management
- Release Management

Education

- Post Graduate Program in Artificial Intelligence and Machine Learning –McCombs School of Business (May 2024 – Feb 2025)
- Bachelor of Engineering in Computer Science & Engineering - Rajiv Gandhi Technical University, India (June 1998 – June 2002)

Certifications

- Program Management Professional (PgMP)
- Project Management Professional (PMP)
- Scrum Master
- SAFe - Leading SAFe
- Architecting Microsoft Azure Solutions (70-535)
- AWS Certified Solutions Architect – Associate
- Product Manager Certification from Indian School of Business, India
- Scrum Product Owner

Skill Summary

- **Technologies** - .NET, MVC, Spring, Spring-Boot, REST, Microservices, SOAP, DynamoDB, Kafka, MongoDB, SQL Server & Oracle, Artificial Intelligence, Machine Learning, Natural Language Processing, TensorFlow, AI Model Deployment.
- **Cloud** – AWS Cloud, Azure, EC2, S3, Lambda, API Gateway, ECS, EKS, Kubernetes, SQL, etc.
- **Project Management Tools:** Microsoft Project Plan, Smartsheet, Asana
- **Agile Tools:** JIRA, Jira-Align, Rally, Confluence
- **E-Commerce Frameworks:** Commercetools, Elastic Path and Microsoft Commerce Server
- **Data Analysis:** Python, SQL, Tableau and Splunk, Grafana, Datadog and Google Analytics
- **GenAI:** Amazon Bedrock, LangChain, LLM & RAG
- **Additional Tools:** Slack, Zoom, Google Workspace App-Dynamics & New-Relic, Optimizely, Figma, Miro

Work Experience

Principal Technical Program Manager

Lululemon, Seattle, WA

07/2023 – Present

- Spearheaded \$5M+ B2B e-Commerce platform transformation; defined roadmap, engineering milestones, and operational readiness, driving 30% improvement in onboarding.
- Led the global POS Infrastructure team for Oracle Retail Xstore and Xcenter across 1000+ stores worldwide (NA, EMEA, APAC, CA), in partnership with regional product and tech teams, ensuring compliance, resilience, and minimal business disruption.
- Led a critical B2B eCommerce initiative, collaborating with 20+ cross-functional teams (Product, UX, QA, Security, Legal etc) to align business and technical strategies.
- Partnered with Product and Engineering teams to define MVP, creating a program roadmap and milestones that led to a 15% improvement in on-time delivery.
- Coordinated scope, requirements, timelines, and milestones across 15+ teams, ensuring 95% program success rate.
- Delivered program status, risks, and mitigation strategies to stakeholders and senior leadership, maintaining 100% transparency.
- Developed and executed a UAT plans, ensuring 100% validation of B2B eCommerce features with Business, Finance & Tax teams.
- Worked with vendors on Business Change Management – User Migration, Business Operation Team Training and onboarding.
- Executed a large-scale customer migration for a next-gen e-commerce platform, achieving 99.99% availability and a 30% reduction in transition time, ensuring zero revenue impact.

Sr. Technical Program Manager

Nordstrom, Seattle, WA

07/2021 – 05/2023

- Led Customer Access program, improving security and reducing fraud with Agile and 10+ teams.
- Managed timelines and updates, achieving 100% on-time delivery of program milestones.
- Achieved a 35% reduction in service tickets by identifying and resolving critical customer journey pain points.

Sr. Technical Program Manager

Amazon, Seattle, WA

03/2019 – 07/2021

- Defined MVP program roadmap and milestones with Product Managers, aligning with business objectives and ensuring 100% on-time feature delivery.
- Partnered with 10+ key stakeholders to articulate technical components, improving cross-functional alignment by 20%.
- Scheduled, tracked, and ensured progress, achieving 100% on-time delivery of milestones.
- Directed end-to-end global B2B pricing and transaction platform rollouts across 8 countries with real-time payment validation, improving accuracy by 40%.

Group Technical Manager

HCL Technologies – India, UK, and US

03/2005 – 03/2019

- Managed an annual program budget of \$10M+ and a team of 65 members.
- Coordinated with Product, Engineering, and cross-functional teams to identify scope, OKRs, constraints, dependencies, risks, mitigation strategies, and schedules for new products and features, ensuring 100% effective program execution and a 20% reduction in risk-related delays.

System Integrator

CMC, India

12/2004 – 03/2005

Assistant Software Consultant

Technosys Services, India

08/2003 – 12/2004

Software Programmer

Connect Technologies, India

07/2002 – 07/2003

Key Programs

B2B e-Commerce Platform and Point of Sale (POS) – Infrastructure (Lululemon)

07/2023 – Present

Role: Principal Technical Program Manager

B2B e-Commerce Platform - The Lululemon B2B e-Commerce Program leverages Composable Commerce to build a flexible, scalable platform with an API-first, headless architecture. It integrates advanced features for seamless order building, checkout, and product selection, while empowering internal users and partners with tools for efficient management and self-service, driving long-term growth and innovation.

Point of Sale (POS) Oracle Xstore & Xcenter - Leading the global POS infrastructure program for Oracle Retail Xstore and Xcenter across 1000+ stores worldwide (NA, EMEA, APAC, CA). Program scope covers Xstore/Xcenter version upgrades, software upgrades, security patching, and security & vulnerability remediation, ensuring compliance, resilience, and seamless operations across all retail regions.

Technologies: Commercetools (Headless, Composable, API first eCommerce Engine), Frontastic, Micro-services, AWS-DynamoDB, AWS-Lambda, S3, AWS-API-Gateway, EKS, Kafka, React.js & Node.js, Splunk, Smartsheet, Jira, Confluence, Shape, APIGEE, CyberSource, Vertex, Figma, Miro, Google Analytics, Datadog, Python (Data Analysis)

Achievements:

- Developed end-to-end program structure and processes, meeting 100% of program deadlines.
- Delivered GenAI-powered Bulk Order Assistant, enabling enterprise users to create large repeat orders via natural language, reducing cart build time by 50% and improving checkout success by 30%, using Amazon Bedrock and LangChain.
- Implemented RACI, Governance Model, and Change Request Process, reducing program delays by 20% and enhance decision making.
- Created strategic planning mechanisms (Quarterly Planning, Product Roadmap), ensuring alignment with business objectives and achieving 95% of milestone targets on schedule.
- Developed & executed Business Change Management plan and successfully migrated all the User in phases from the legacy B2B platform to the new e-Commerce platform.
- Analyzed JIRA data to improve program efficiency by 15%, mitigating delays and reducing average cycle time by 10%.
- Developed automated dashboards and sprint performance metrics using JIRA data, enabling weekly executive reporting on velocity, bug rates, and risk flags.
- Partner with regional product and technology teams to plan and execute quarterly upgrades, ensuring on-time delivery with minimal disruption to store operations.
- Directed Xstore and Xcenter upgrade cycles, ensuring global consistency, compatibility, and enterprise standards alignment.

Customer Identity and Access Management (Nordstrom)

07/2021 – 05/2023

Role: Sr. Technical Program Manager

The program aims to improve customer identity and access management across all Nordstrom platforms by offering a secure, streamlined solution. Its objectives include reducing friction, protecting customer data, and minimizing fraud, with a cross-brand credentials solution developed for Nordstrom, Nordstrom Rack, Store, and Credit.

Technologies: Micro-services using Spring-Boot, AWS-DynamoDB, AWS-Lambda, S3, AWS-API-Gateway, EKS, Kafka, React.js. Splunk, New-Relic, Go-lang, Optimizely, Shape, Tableau, Jira and Confluence.

Achievements:

- Improved Agile quality and planning processes, resulting in a 20% increase in project delivery speed and a 15% improvement in team performance.
- Translated strategic objectives and OKRs into actionable features, achieving 100% alignment with business goals and delivering key features on time.
- Managed roadmaps for 5+ cross-functional teams, successfully tracking and meeting 95% of program milestones.
- Resolved customer service issues, leading to a ~35% reduction in customer service tickets and improving response times by 20%.
- Partnered with Security and Compliance teams to review cloud architecture, ensuring adherence to SOC 2, ISO 27001, and internal audit controls.
- Played a versatile role as Product Owner, Scrum Master, and Technical Program Manager.

Amazon.com – B2B Pricing (Amazon.com)

03/2019 – 07/2021

Role: Sr. Technical Program Manager

The Volume Aware Pricing (VAP) program offers competitive pricing to customers purchasing in small quantities over time, without requiring rebates or long-term commitments. Discounts are based on a customer's trailing twelve-month order history. As program leader, I successfully launched VAP in 8 countries: the US, UK, Italy, France, Spain, Germany, Japan, and Canada.

Technologies: Micro-services using Spring-Boot, AWS – SNS, AWS – DynamoDB, React.js, AWS-Lambda, S3, AWS – API-Gateway

Achievements:

- Resolved Discount stacking issue having yearly impact of \$40 M on Amazon Business
- Worked with 25+ cross functional teams and launched the new Pricing Model Program in 8 countries.
- Strategically avoided launch blocker issue/risk and saved the Program from delay.

Digital Commerce Platform (DCP) (T-Mobile)

06/2016 – 03/2019

Role: Enterprise Technical Program Manager/Sr. Manager

DCP serves as the primary source for commerce solutions for T-Mobile Web channels. My team has developed microservice-based headless e-Commerce Platform.

Technologies: Spring-Boot based Micro-services, APIGEE, AWS - Oracle, Splunk, App-Dynamics, Jira, Confluence, Apache Ignite, Elastic-Search, ActiveMQ, DynamoDB, Tableau, and Kubernetes.

Achievements:

- Contributed to the digital transformation by creating headless e-Commerce platform deployed on AWS. Monolith to Microservice migration.
- Identified and resolved cart latency issues, implementing solutions that improved cart performance by 700
- Established DevOps processes (Shift Left & Right and on-call) and end-to-end agile processes within the program, improving efficiency and collaboration across development and operations teams.

Other Key Programs

Enterprise Digital E-Commerce Platform (Trimble)

10/2014 – 06/2016

Role: Sr. Technical program Manager / Sr. Software Development Manager

Technologies: Spring-Boot, Cortex 1.13, Aria (Billing and Subscription), Safe-Net (Entitlement), CyberSource, Vertex, WSO2 (ESB, API-M and Identity), AWS - EC2, AWS - Oracle RDS, S3 and Cassandra

One.Norton.com, Manage.Norton.com and www.MobileSecurity.Norton.com

08/2011 - 10/2014

Role: Software Development Manager

Technologies: .NET 4.0, MVC 4.0, C#, WCF, XML, XSL, XSLT, XSL, Serialization (XML and JSON), jQuery, Ajax, LINQ, SOAP, MVC Web API, Rest Services, Selenium, Final-Builder, Cenizic, Y-Slow, Google-Speed, NUNIT, N-Cover, FxCop, Fortify, SPLUNK, Omniture, Google-Analytics, JIRA and Perforce

Shop.Cambridge.org – Cambridge University Assessments

09/2009 – 07/2011

Role: Sr. Technical Lead

Technologies: .NET 3.5, C#, ASP.NET, MVC 2.0, WCF, Windows SharePoint Services 3.0 and Commerce Server Web-Services, SQL Server 2008. Payment Gateway: Barclay's ePDQ Payment Gateway. e-Commerce Engine: Microsoft Commerce Server 2009

Annul Invoicing and Royalty for Elsevier

01/2007 – 09/2009

Role: Technical Lead

Technologies: C#, ASP.NET, ADO.NET and AJAX. Database: SQL Server 2005. Reporting Tool: SSRS, SSIS

Textbooks.Elsevier.com & Books.Elsevier.com

10/2005 – 01/2007

Role: Sr. Software Engineer

Technologies: C#, ASP.NET, ADO.NET and AJAX. Database: SQL Server 2005. Reporting Tool: SSRS, SSIS

Electronic Field Notebook for Elsevier

03/2005 – 09/2005

Role: Software Engineer

Technologies: VB.NET, ADO.NET. Database: MSDE 2000 and SQL Server 2000.

Technical Program Leadership Highlights

- Led multi-year enterprise e-Commerce platform transformation at Lululemon, aligning Product, Engineering, Compliance, and Finance to launch a scalable B2B e-Commerce platform with 99.99% uptime and 30% faster onboarding.
- Directed the global POS Infrastructure team at Lululemon across 1000+ stores (NA, EMEA, APAC, CA), managing quarterly upgrades, Xstore/Xcenter upgrades, and security vulnerability remediation, improving system reliability and performance while ensuring compliance and minimal business disruption.
- Delivered Customer Identity and Access Management program at Nordstrom, improving cross-channel fraud detection, SOC 2 alignment, and reducing support costs by 35%.
- Drove global pricing transformation at Amazon across 8 geographies with real-time dynamic discounting engine, increasing pricing accuracy by 40% and avoiding \$40M in discount stacking issues.
